

## Activity: Discover Your Digital Type

**Description:** Learners take a digital career quiz and reflect on the results.

**Objective:** Guide learners to explore tech roles through interactive self-discovery.

**Time:** 30-40 minutes

**Materials:** Internet access and devices for all, Padlet or similar online bulletin board or collaborative wall tools.

**Steps:**

1. Learners take one of the quizzes on devices:

a. Tech Skills

Discover your dream digital job with this quick and free quiz! It has questions based on daily life to set you on the correct career path and information about careers.

<https://www.techskills.org/careers/quiz/> b. Tech Career Quiz – which job is right for

me? You do not know which is the right tech job for you? Take this nice, simple, and

quick

quiz, it asks some great questions and it then recommends digital jobs based on your

answers. <https://careerfoundry.com/en/blog/career-change/tech-career-quiz/>

2. Learners are given 5 minutes to reflect on the results and take notes on these questions:

a. What career did you get from the quiz?

b. Were you surprised by the results? Why?

c. Have you ever thought about this job before? What surprised you?

d. What skills do you already have that fit this job?

e. What would you like to learn more about in this career path?

3. Learners upload their answers and results to the designated Padlet. Optionally, they can also include AI-generated visuals representing their envisioned careers to make it more interesting.

4. In a large group setting, learners reflect on their collective results. Educator can facilitate a conversation by asking “What are the skills necessary for this career?”, “What would you do now to achieve this career?”.

You can use the activity Present Your Dream Digital Job as a follow-up in the classroom. The two activities relate to the Your Guide to Careers in Digital Infographic. Feel free to use all three resources during a lesson.
